

## Project Planning

So I can better match you with a mentor, please answer the following questions.

1. What topics/ areas of biology are you especially interested in? Not interested in?
2. Do you want to do an off-campus or on-campus project? Please keep in mind the scheduling constraints, and the need to provide your own transportation.
3. If you want to work off-campus, where do you live? Are there any specific geographic constraints on where you work? **Please check with your parents on this one.** (For instance...could you drive to South San Francisco? Across the Dumbarton Bridge? How often—twice a week? Once in a while? Every day?)
4. Are you interested in/willing to work with a partner? If so, who?
5. Do you plan to make this project your senior project?
6. Do you have a specific mentor in mind, and/or do you or your family have any contacts who might be helpful in arranging a mentor?
7. What sports do you play? (At Menlo and off-campus) List seasons and time commitments. Any other major extracurriculars that have set schedules—rehearsals, performances etc?
