

6th GRADE SF BAYLANDS PROJECT: SELF EVALUATION

Your Name _____ Partner(s) Name _____

Topic: _____

Congratulations on a job well done! You worked hard, were focused, finished on time, and did a great job presenting and listening to your peers.

To get even more out of this project we want you to spend a little time reflecting on each step of the project and “debrief” your work. This is the final step and if you take it seriously your next project will be even better! Please answer these questions thoughtfully, truthfully, and on your own (i.e. do not talk with your partner(s)). This will **NOT** affect your grade for this project.

1) Please check one box for each stage of the project:

MY OPINION	I did a really thorough job on this stage and it made the next stage much easier.	I did a decent job at this stage, but it was a little difficult to transfer my work to the next stage.	I did an OK job, but I struggled with the next stage because I wasn't as prepared as I could have been.	Whew! I blew this stage of the project and REALLY had a hard time with everything else.
Stage One – Research				
Stage Two – Creating the content: your storyboard or plan				
Stage Three – Creating your Presentation				
Stage Four – Presenting				

2) What aspect of this project did you enjoy the most? Why? (Please answer in a complete sentence (s).)

3) What aspect of this project did you enjoy the least (or struggled with the most)? Why? (Please answer in a complete sentence (s).)

4) Use the circle below to draw a pie chart showing how much you contributed to each stage of the project. Then write a few sentences describing how you and your partner(s) worked together during this project.
